LETTER OF RECOMMENDATION

It gives me immense pleasure to recommend my student Prathap Selvakumar for the Master's Program at your renowned University. As a faculty at SRM University, I base this recommendation on my experience of teaching him for 2 years of his undergraduate study and guiding him in his project. I have taught him Data Structures and Algorithm (Semester 3), Design and Analysis of Algorithm (Semester 4) and Artificial Intelligence (Semester 6). He is a very attentive and committed student, I have seen his progress and I am satisfied with his consistency. He has also exhibited a keen interest in my subjects, hence has managed to keep up in the problem-based classes as well. He is very much research oriented and has good affinity towards taking in new concepts and delivering outputs.

Our familiarity stems from our shared interests in project. His participation in the project "Facial Emotion Recognition using Machine Learning" and "Snake Detection in Farmland" truly impressed me; despite having strenuous deadlines and targets with Artificial Intelligence course, he managed to work well to meet the deadlines. He was fast to grasp any concepts that was presented to him, and he completed his portion of the task with no difficulty. He and his partner performed a fantastic job of checking the results obtained on a regular basis and effectively following up.

Prathap exudes self-confidence and has consistently demonstrated a strong work ethic and dedication towards his academic during all those years. He has an open and fertile mind. He repeatedly proved his conceptual ability and creative outlook in the classroom. He is good in communication skills in both written and oral. He has flair in keeping himself abreast with latest development in technology. Considering his motivation, perseverance and intelligence, I am of the opinion that he will scale the highest peaks in the fields of his interests. I therefore strongly recommend his application into your esteemed University for his Master's program possibly with an adequate financial aid.

Sincerely,

Dr. B Aarthi, M.E.,Ph.D.
Assistant Professor
Department of Computer Science and Engineering
SRM Institute of Science and Technology
Ramapuram, Chennai, India
