LETTER OF RECOMMENDATION

I am extremely pleased to pen down a letter of recommendation for my student Prathap Selvakumar for admission to your esteemed University. I mentored him for his project in second year of his undergraduate studies, where he worked on "COMPARITIVE ANALYSIS IMPLEMENTATION OF QUEUING SONGS IN PLAYERS USING AUDIO CLUSTERING ALGORITHM". He always supported his peers actively and participated in team discussion.

Prathap is self-motivated, determined and committed to achieving his objectives. These characteristics set him apart from the crowd and make him one-of-a-kind. He has always shown a strong interest in subjects related to computer science, and he has worked hard to stay in current field. He has been steadfast in his decision to pursue higher education, and his grades have always reflected this.

He thrives on learning, and his learning abilities allow him to continue studying in an autonomous manner. He has excellent communication skills, both in written and oral. His ability to grasp concepts quickly and his analytical and application-oriented mindset were highlighted by his competence and consistency throughout his course.

He has great potential and will no doubt stand out as an extraordinary student in any institution. I have done my very best in guiding him in his path and I strongly agree with his decision to study further. Evidently, he has my absolute endorsement for admission into your reputed institution.

Sincerely,

Mrs. Swathi., M.E., (Ph.D)
Assistant Professor
Department of Computer Science and Engineering
